Appendix Data will be provided by Institutional Research - NOR/DAN

Since the data provided covers all courses for a thirteen semester time frame, it is contained in the attached spreadsheets. Please note that the spreadsheet runs horizontally and vertically with three separate tables: student enrollment counts, success rates and FTEF, WSCH and FTES counts. Open and save the two Excel documents below to your computer for analysis.

Please note the following conventions are used:

Valid grade notations: A, B, C, D, F, CR, NC, W, FW, I or IX (Incomplete).

The Retention Rate is computed based upon the percent of students retained in courses out of the total enrolled in courses. The retention rate is calculated by dividing the numerator by the denominator and multiplying by 100:

Numerator: Number of students (duplicated) with A, B, C, D, CR, NC, I

Denominator: Number of students (duplicated) with A, B, C, D, F, CR, NC, W, I

Success Rate I: Percent of students successful in courses out of total enrolled in courses. The success rate is calculated by dividing the numerator by the denominator and multiplying by 100

Numerator: Number of students (duplicated) with A, B, C, CR

Denominator: Number of students (duplicated) with A, B, C, D, F, CR, NC, W, I

Success Rate II: Percent of students successful in courses out of total enrolled in courses (excluding students who received a “W” grade). The success rate is calculated by dividing the numerator by the denominator and multiplying by 100

Numerator: Number of students (duplicated) with A, B, C, CR

Denominator: Number of students (duplicated) with A, B, C, D, F, CR, NC, I
