Improvement Recommendations

DRC students' success rate for spring and fall 2015 exceeded the target rate. In both terms, DRC students were also equal to or exceeded the success rate of the D&C students. One of the areas of improvement for this topic for 20 16H be to provide academic success workshops geared towards students with disabilities. The DRC staff and faculty will collaborate to develop strategies that can further improve the academic success rate of DRC students.

SLO #2: DRC students' ternto-term persistence rate will be comparable to that of the general student population.

Findings/Data Analysis

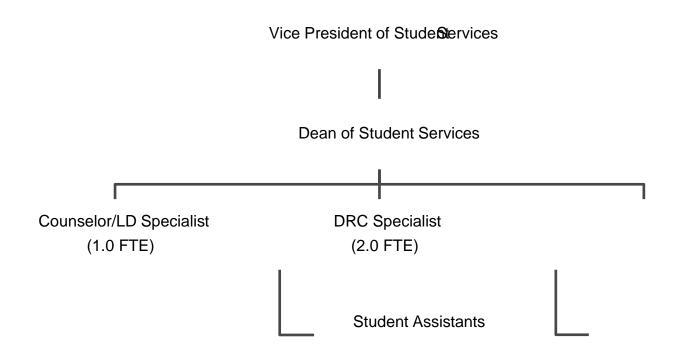

The termto-term persistence rate of DRC students from fall 2014 to spring 2015 was 76% compared to the general population's 73%. The annual persistence rate from fall 2014 to fall 2015 fell for both groups, but DRC students outperformed students from the general population by 10 percentage points (68% to 58%). The stronger persistence rate for both timeframes is another indicator that DRC students are doing well academically compared to thei31 (t)-2 (ocl(t)4 (m)-2 (i)-2 (c)1ETf -0: (or)3 1

Improvement Recommendations
The 39% SEP development rate for new DRC students is significance than the target and approximately 50 percentage points lower than the 2014

3. Director (FT)

Reason:

The DRC continues to see increases in the number of students it serves and complexity of issues resulting from their disabilities. For example, Norco College has a growing population of students on the Autism Spectrum Disorder (ASD) and those with psychological disorders. Meeting the accommodation needs of these students requires specialized training of staff, raising awareness among faculty and staff, and working more closely with parents and disability advocates. DSPS as a program is also in the midst of a statewide TitleWSaR DRC Coutio7.e -4 9. (e4 T54 (u)6. (e W0/LBo)14B364 T54 72.48 262.68549)
