### Brazil Is Looking Like The Worst Place On Earth For COVID -19

- The fresh wave of infections now racing across the landscape has reached her city, flooding hospitals with patients, and pushing intensive care unit occupancy rates up to 96%.
  - This week, Brazil's registered COVID-19 deaths are likely to rise above 300,000 — a toll exceeded only by the United States. Ribeiro bleakly remarks that this number is about the same as the population of her city.
